CS-250EU

- 10" Blade
- Manual Feed
- Meters up to 45° left and right
- 110V, 1PH

The Baileigh CS-250EU is a great all around, general purpose cold saw that won't break the bank. The CS-250EU cold saw is a manually operated 10" circular cold saw that is built for medium grade production seen in most small fabrication shops, but what makes the CS-250EU unique is that it is also portable. Powered by 110 volts that is readily available anywhere, the base of the CS-250EU is removable and what is left is a self contained unit that includes everything needed to make great cuts anywhere.

The ridged fully cast iron head of the CS-250EU has a self contained coolant tray that holds the flood coolant system that is standard on this model. The CS-250EU has a 10" blade that runs at 54 rpm, perfect for most metals. The maximum capacity of the CS-250EU is 3" round at both 90 degrees and 45 degrees. The vise features a cam lock device that makes for fast loading and unloading of material. The vise also supports the material on both sides of the blade, ensuring a nice burr free cut.

Specifications

Max Blade Diameter	10"
Operation	Manual
Head Miter	45° Left/ 45° Right
Round Solid at 45°	1.2"
Square Tube at 45°	2.2" x 2.2"
Round Tube at 45°	3"
