### DBD-16H **PORTABLE** MINI REBAR BENDER

Tool Manual 0-180 degree Rebar Bender

The DBD-16H is a small lightweight portable rebar bender that can save valuable time. The angle adjustment lever allows you to bend rebar up to and including #5 (5/8") grade 60 rebar. This is a strong electric/mechanical bender that can dial-up bends from 1-180°. You can use it at your job site or in your shop. The DBD-16H portable rebar bender comes complete with a removable extension table, a tool kit, and a standard foot pedal control switch for hands-free bending. BN Products-USA backs this tool with one-year parts and labor warranty.

### READ ALL INSTRUCTIONS AND SAVE THEM FOR FURTURE REFERENCE

Thank you for purchasing the DBD-16H Mini Rebar Bender. Please read this instruction manual carefully before use, and use the product safely and correctly. After reading, PLEASE keep it in a place where it can be seen at any time.

NOTE: When using electric tools, basic safety precautions should always be followed to reduce the risk of electric shock and personal injury, including the followings items:

- 1. Keep hands away. From all moving parts and rollers while operating.
- 2. Dress properly. Loose clothing or jewelry can get caught in moving parts. Wear sturdy boots with non-skid soles. Steel toed boots and safety glasses are recommended.
- 3. Keep children and bystanders away. Distractions can cause you to lose control.
- 4. Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.
- 5. Stay alert. Watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs or alcohol. A moment of inattention while operating power tools may result in serious personal injury.

- 6. Do not exceed the maximum number of bars that can be bent at one time. Please refer to specifications.
- 7. When positioning the bar between rollers, make sure to lay it flat on the machine surface. Failure to do so may cause the rebar to fly out.
- 8. Do not expose tool to rain or use in damp locations. Do not use tool in presence of flammable liquids or gases. Keep work area well lit. If the tool is used outdoors, keep it covered when not in use and protect it from rain or water.
- 9. Do not bend materials harder than "Grade 60 or 420N/mm2" as they will either crack and fly out or cause machine failure.
- 10. Disconnect tool from receptacle when not in use. Disconnect when servicing or changing rollers to prevent accidents.
- 11. Keep tool clean at all times for best and safest performance. Follow instructions for lubricating and changing parts. Keep hands dry and free of oil or grease. Inspect switches, tool cords periodically and have them repaired or replaced by an authorized service center if damaged. Check moving parts for alignment and binding as well as for breakage and improper mounting. Damaged parts should be repaired or replaced by an authorized service facility unless otherwise indicated in this instruction book

Specifications:		
Maximum Bending Diameter:	5/8" (#5) Rebar (16mm) Grade 60	
Bending Angle / Speed	Up to 180 degrees / 6 seconds	
Voltage /Amperage:	120V 50/60Hz / 11 amps / 1050 W	
Tool Weight:	40 lbs (20 kg)	
Dimensions L x W x H:	12.5" (320 mm) x 13.75" (350 mm) x 9.65" (245 mm)	
Maximum Number of Bars	One	

WARNING - Incorrect use could result in death or serious injury to the user or others near by.

This product must not be used for purposes other than those described in this instruction manual.

Keep your workbench and surrounding workplace clean and uncluttered.

Please use safety glasses, gloves and proper safety shoes.

Use this tool on a stable surface with a stable working posture with your feet firmly planted and balanced.

This is an electric power tool so be extremely careful of electric shock. Remember that moisture reduces the insulation properties of the motor and may cause electric shock. Do not use in the rain, wet places, or situations where water and oil could easily enter inside the machine.

Please use a GFI power supply, and be sure the tool is grounded correctly.

Please work properly. Baggy clothes, jewelry such as necklaces, ties, open cuffs, could get caught in the rotating part of this machine.

Please be careful about ignition and explosion. Power tools emit rectified sparks during use and when the switch is opened and closed. Products emmiting flamable fumes may be ignited or explode Never use it in locations where these dangers are present. Avoid using this tool in poorly ventilated places such as a closed area.

Do not mishandle the power cord. Do not carry the tool by the power cord, or pull the cord to disconnect it from the outlet. Be careful that the cord does not touch high-temperature heat, oil, chemicals, or sharp objects, etc.

Turn off the power tool and remove the plug from the power outlet in the following cases; when inspecting the tool, doing maintenance or repair, and when the tool is not in use.

Before inserting the plug into the power outlet, make sure that the switch is turned off.

Before use, carefully inspect the cord and tool for any damage, and make sure that it can perform the desired function.

Please note that overheating can cause a malfunction.

Please use specified genuine parts when repairing this tool.

If you feel any abnormality while using the product, stop using it immediately and perform inspection and repair.

Do not exceed the maximum capacity

Handle power tools with care. If dropped or hit by mistake, the outer frame may be deformed or damaged, take the time to perform a thorough inspection before use.

Store power tools in places that are out of the reach of children. Storage areas should be locked and where

3450 Sabin Brown Road • Wickenburg, Arizona 85390 (800) 992-3833 • (928) 684-2813 • www.bnproducts.com

temperature and humidity do not change suddenly. Storage areas should also be out of direct sunlight, rain, and away from moisture.

Be mindful of voltage drop when using an extension cord.

This power tool is designed for bending rebar used for concrete reinforcement. Do not use it for any other purpose.

Do not exceed the maximum capacity of the machine. See the specification chart.

When placing and using the product, use it on a level and stable surface.

Do not touch the rollers or moving parts, or bring your hands or face close to them during use.

Please wear safety glasses, and other appropriate clothing including gloves and proper safety shoes when using this tool.

Do not leave this tool with the plug connected to the power supply when not in use.

Be sure use a grounded 3-prong plug to prevent electric shock. To avoid electric shock, do not work with water or oil on your hands.

Do not leave this tool outdoors or use in the rain or snow.

WARNING: ALWAYS UNPLUG THIS TOOL BEFORE ATTACHING OR REMOVING ROLLERS OR ACCESSORIES.

- 1. This tool comes with a stationary roller and a moving roller. Make sure that both rollers are set correctly...
- 2. Plug the electrical power cord into an appropriate
- 3. Lay the bar on the machine surface between the center roller and bending roller. Adjust the stopper so that the bar is parallel to the front edge of the machine.

- 4. Turn the main switch on. It should light-up with power.
- 5. Set the angle and make a test bend. If the bent angle is not exact, adjust the angle selector slightly to the right or left.
- 6. Push the operation button or foot switch. The moving bending roller will automatically return to the start position once the bend has been completed.
- 7. If it is necessary to stop the machine in an emergency, remover your finger from the start switch or release your foot from the foot operated switch. The bending roller will return to the start position automatically.

WARNING: Never touch any moving parts or rollers while the rebar bender is being operated.

For stirrups, cut your rebar to the desired length before bending. Then make both bends for your turndowns. Finally make your (3) 90° bends to connect your ends together. See below.

#### INSPECTION AND MAINTENANCE

- WARNING: ALWAYS UNPLUG TOOL BEFORE PERFORMING MAINTENANCE.
- DO NOT USE PARTS OR ACCESSORIES THAT ARE NOT GENUINE REPLACEMENT ITEMS FROM BN PRODUCTS-USA

At least once a month check the carbon brushes for wear or damage. Replace with new brushes if they are worn out.

Always check the tool before use that there are no loose nuts and bolts before starting the operation.

After operation is completed, be sure to remove metal dust, dirt, oil, etc... adhering to the machine surfaces.

#### More Tools

### PORTABLE #7 JOB SITE REBAR BENDER

Capable of bending No. 7 (7/8") Grade 60 Rebar 180°

It has a high-speed, automatic working cycle that is easy to operate and has two angle settings that can be preset making rebar stirrups easy. Weighs less than 200 lbs and can run off of a generator (12 amps). It includes a hands-free foot pedal control switch and a complete set of roller dies for making correct radius.

Product No. DRD-25X

Description Portable Rebar Bender

### THE CUTTING EDGE SAW™

3/4" Rebar and 7/8" All-thread rod capacity, 9 amps

- · 3-position removable side handle and a rotating trigger handle
- Double insulated power harness
- · ETL Certified and Listed

Includes: 2 TCT cutting blades, extra set of motor carbon brushes. removable side handle, chip collector attachment, tool kit, and operations manual with a plastic molded carrying case.

Product No. BNCE-20 Cutting Edge Saw™

### THE CORDLESS CUTTING EDGE SAW™

3/4" rebar and 7/8" all-thread rod capacity, 24V Li-lon battery

· Comes with two (2) 24V batteries plus a quick-time AC charger unit

We also include two specially designed cutting blades plus a chip collector bag and nifty carrying case

Product No. Description BNCE-20-24V Cordless Cutting Edge Saw™

### THE TIGER TIER™ **REBAR TYING MACHINE**

New generation Rebar Tier

- Can tie two #6 (3/4") rebars in seconds
- Comes with two 18V Li-lon power packs and a quick-time AC charger unit
- Light weight (5.8 lbs) with a golve-friendly grip and a one-year warranty
- · Comes with a Nifty case that also contains four spools of wire ready to go

### **PORTABLE #5 HYDRAULIC REBAR CUTTER**

Easy to handle in-field portable rebar cutter.

- · Maximum cutting diameter is 5/8" rebar
- · Cutting speed is less than 2.5 seconds with cutting pressure of 15 tons
- This is a hydraulic cutting shear
- · The tool also has a safety relief valve and a cutting guard as

Product No. **DC-16W** 

Description Portable #5 Rebar Cutter

### **PORTABLE #6 HYDRAULIC REBAR CUTTER**

Largest selling in-field rebar cutter in the USA

- · Maximum cutting diameter is 3/4" rebar
- · Cutting speed is less than 3 seconds with cutting pressure of 15 tons
- · This is a hydraulic cutting shear
- · The tool also has a safety relief valve and a cutting guard as standard features

Product No. DC-20WH

Description Portable #6 Rebar Cutter
